Summary

Computer Science graduate who builds and ships software using AI-assisted development. Has taken three web apps from idea to release by prompting and iterating with Claude Code, and brings Python, SQL, JavaScript and C++ foundations from data engineering and simulation work. Currently evaluating data for AI model training at TELUS International. Eager to grow in AI platform development and application security.

Skills

AI-Assisted Development: Claude Code, prompting for code generation and debugging, AI training data evaluation
Languages: Python, JavaScript, SQL, C++, C#, HTML, CSS
Frameworks & Platforms: React, Vue.js, Nuxt, Node.js, Tailwind CSS, Microsoft Azure, Power BI, Tableau
Tools & Practices: Git, VS Code, npm, Webpack, Jest, Agile/Scrum, OOP, Data Structures, SOLID Principles

Projects

Linework github.com/syafaatsaat/linework

- CV builder that runs entirely client-side in the browser, so user data never leaves the device. Built end to end with Claude Code.

Holo Vault github.com/syafaatsaat/holo-vault

- React shopping app for Pokémon TCG singles, priced at market value. Built end to end with Claude Code.

Memory Legends: See See github.com/syafaatsaat/memory-legends-see-see

- Hero memory game for Mobile Legends: Bang Bang fans. Built end to end with Claude Code.

Work Experience

Freelance AI Data Analyst Jul 2026 – Present
TELUS International

- Evaluate map data, search results and web content for relevance and accuracy to train global AI models, completing 300+ tasks monthly under strict QA guidelines.
- Resolve complex data discrepancies through in-depth research with search engines and geospatial tools.

Junior Data Engineer Program Trainee Jul 2024 – Oct 2024
Generation Singapore (in partnership with Microsoft and Temasek Polytechnic)

- Designed and deployed 2 ETL pipelines in Python and SQL to automate data ingestion and transformation.
- Built Azure-based data platforms for storing and processing structured data, reducing manual handling steps.
- Developed a Python web scraper to extract and clean IMDb's Top 250 dataset into structured CSVs, and visualised results in Power BI and Tableau.

Software Engineer Intern Jan 2022 – Jul 2022
Singapore Institute of Technology

- Built a C# data parser in Unity to integrate 50K+ CSV location records into a 3D simulation.
- Contributed to a 3D virtual model of a 21.7 km^2 area of Singapore using Python and CityEngine.
- Developed interactive 2D/3D visualisation features and redesigned menus based on tester feedback.
- Worked in Agile sprints with daily stand-ups, using Git-based version control for team collaboration and faster debugging.

Education

Bachelor of Science in Computer Science & Game Design 2018 – 2022
DigiPen Institute of Technology Singapore
